Feedback and Sketches

- List of Countries to Choose

- Reactive feedback:
 - Like: Simple and use to understand and use; function that can select recipes by countries is impressive
 - Dislike: screen title is confused; only text on screen
- Reflective feedback(suggestions):
 - Designers can add food pictures under the country subtitle bar

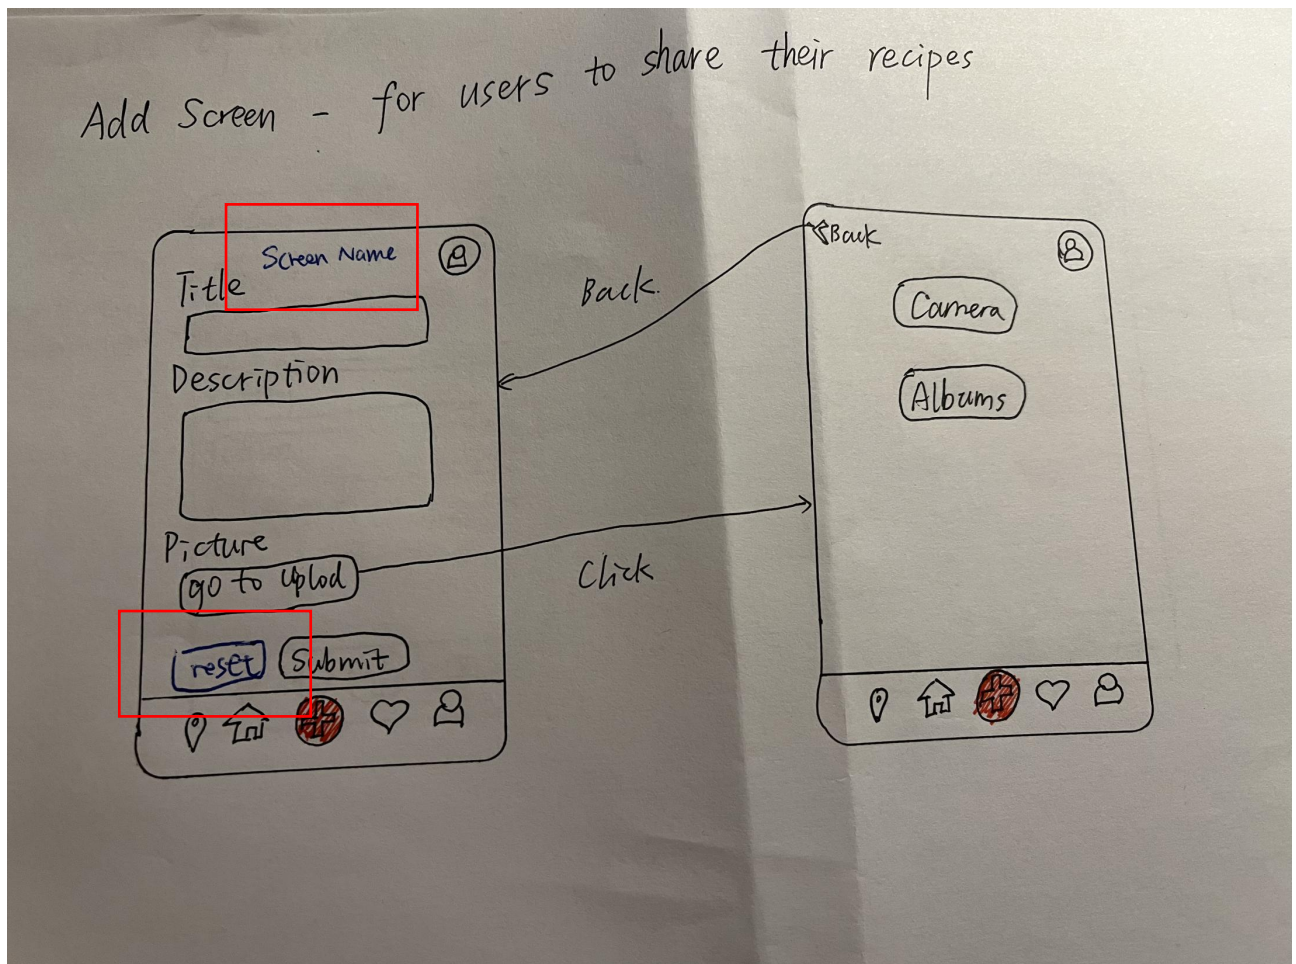

Highlighted places are added by test users

Feedback and Sketches

- Add Screen

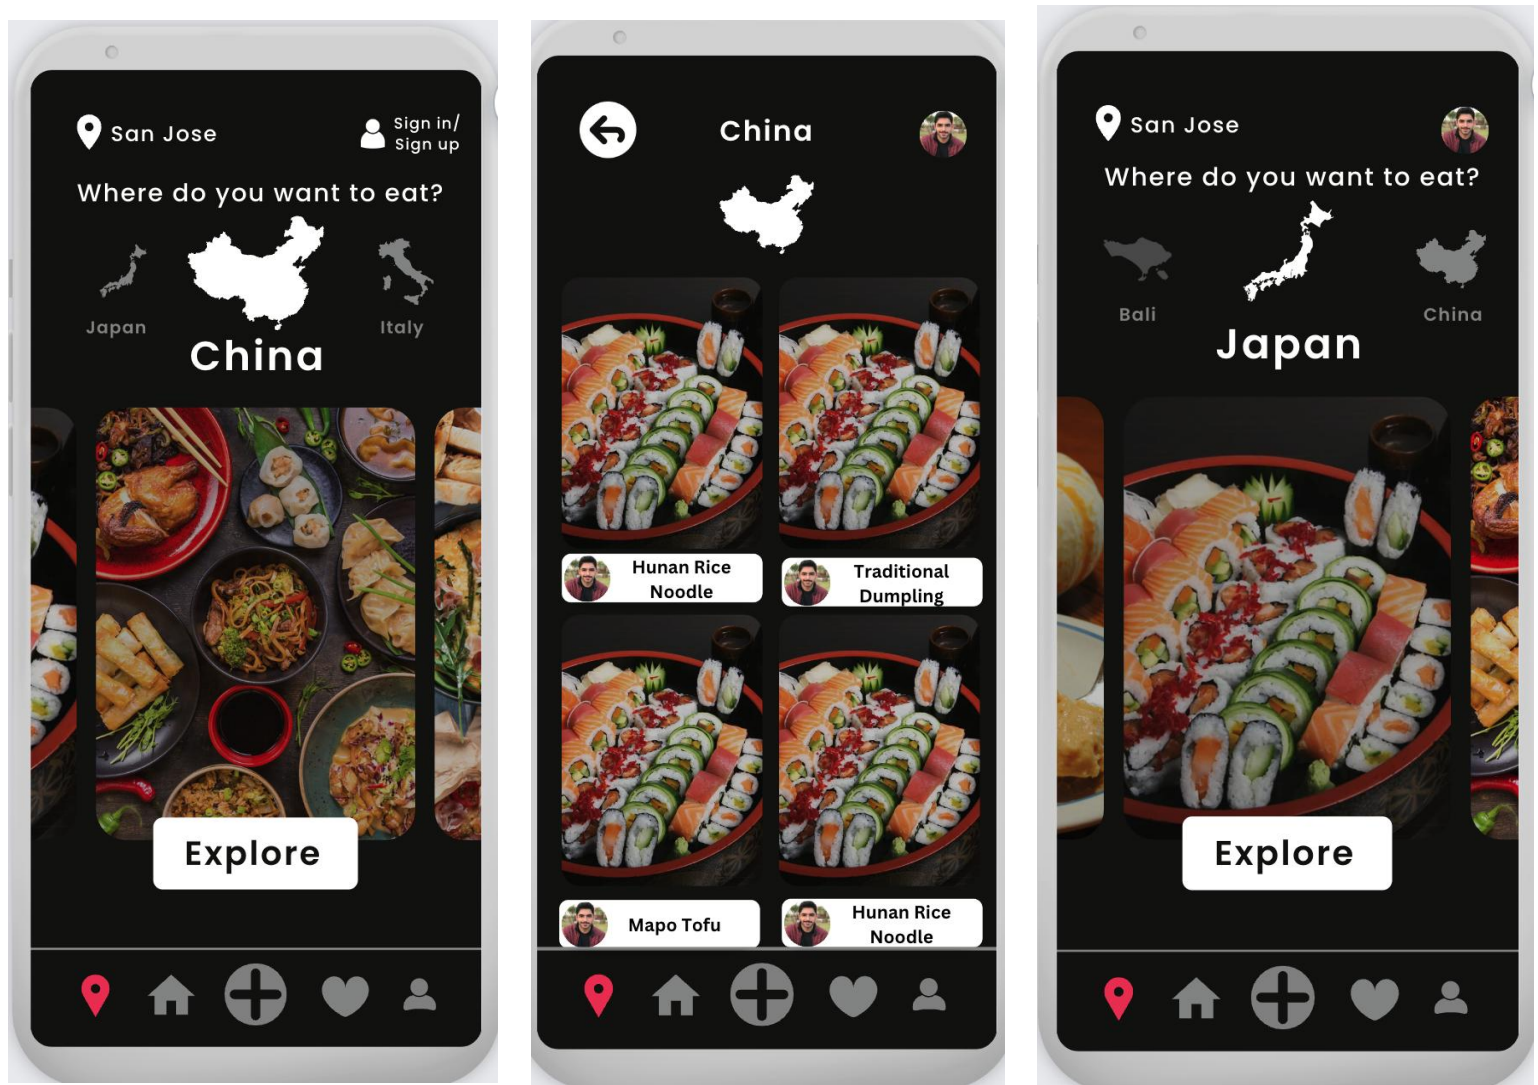

- Reactive feedback:
 - Like: recipes picture upload button is easy to find
 - Dislike: no reset button, no title on screen, cannot upload multiple pictures
- Reflective feedback(suggestions):
 - Add reset button, location selector and title on screen; add function that can delete pictures separately

Highlighted places are added by test users

Design the chosen screens based on the feedback

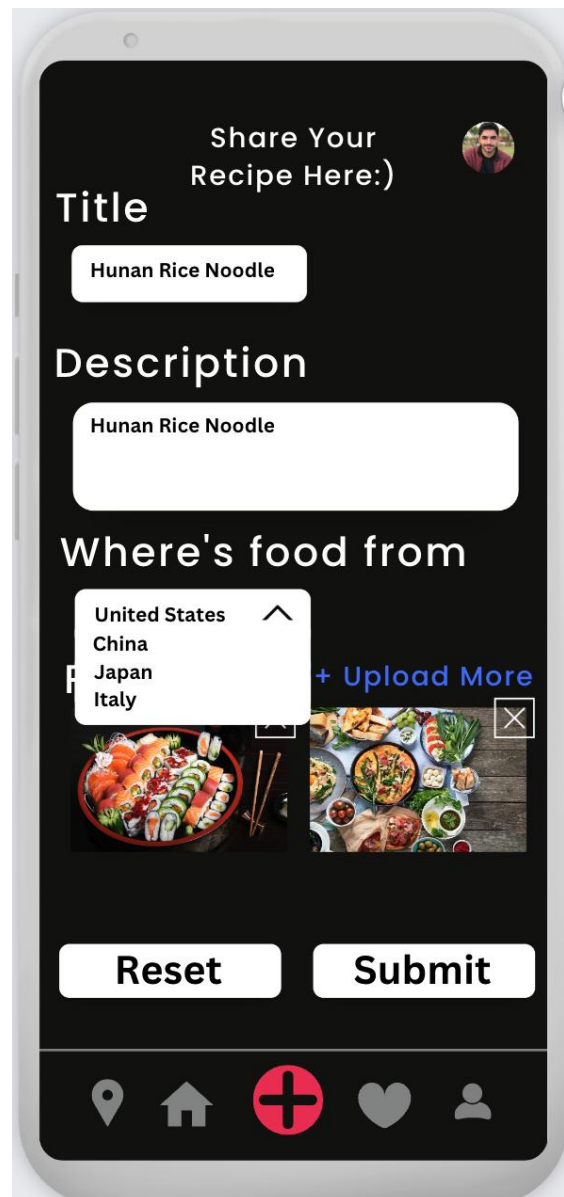

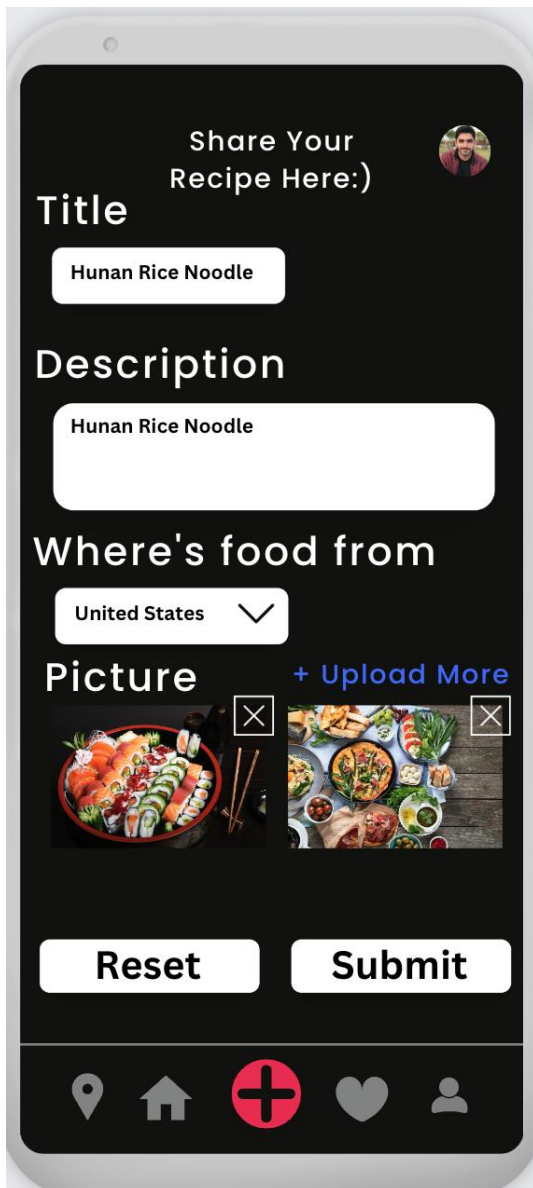

- **List of Countries to Choose**

- We can scroll the image of country map to select our expected location and explore the food in specific locations.
- By clicking the explore button, we can go to a nested page, where we can see the recipes of food from selected locations.

Design the chosen screens based on the feedback

- **Add Screen**

- We can delete uploaded images by clicking the “x” button in the right-top corner of separate image.
- We can also click the blue “Upload More” button to upload pictures from camera or album.
